TEHNOLOGY PARK CELJE IN TECHNOPOLIS CELJE

Space and urbanity placement of Tehnopolis Celje into the urban structure of Celje

Technological park Celje

- Technological Park Celje is a main subprogram content of the integral project Tehnopolis Celje, which consists of 7 key subprograms.
- On 170.000 m² area of Technological city Celje the Technological Park is situated and this again covers 50.170 m² of land. There will be 12 buildings meant for different purposes such as technological companies, developmental institutions, technological centres and educational centres from Slovenia, Europe and rest of the world.
- Technological Park Celje containing technological companies and developmental institutions, will be in constant connection with the international University Herman Celjski, and therefore it will present the key development and innovative infrastructure of a platform constructed for the faster development of Savinja Region, east cohesive regions and the starting point for transfer of technologies and “know how” into south east Europe.

Placement of the technological park into tehnpolis Celje

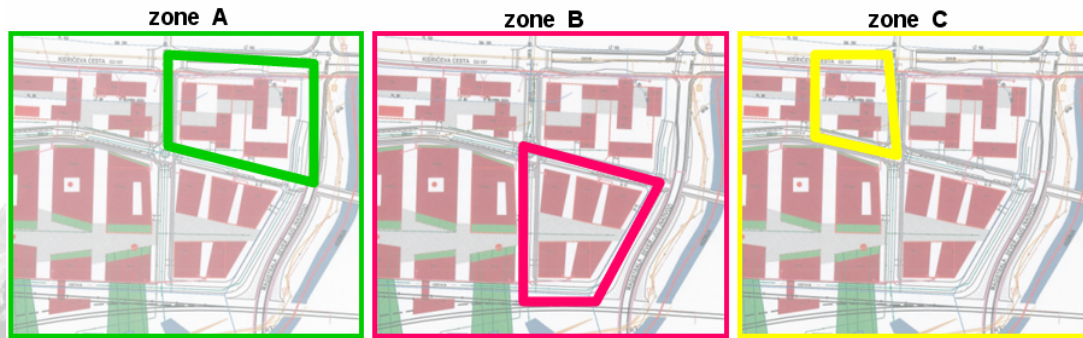

Number of objects (buildings): 12

Number of square meters in objects (buildings): 50.170 m²,

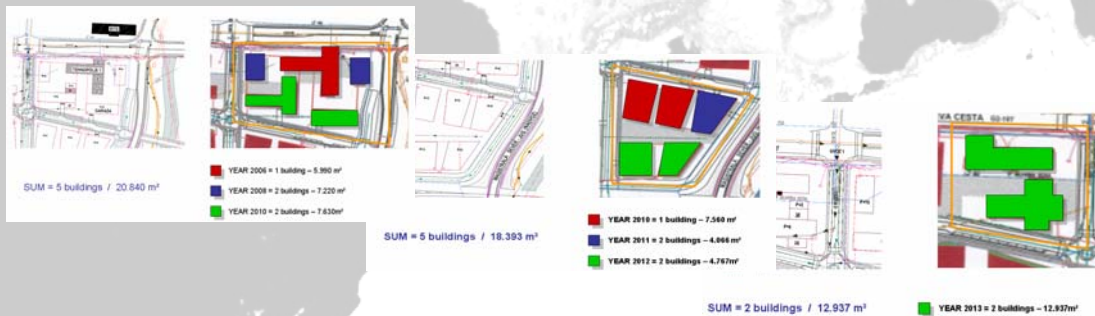

Technological park will be built during the period 2006 to 2013 containing technological companies, developmental institutions, technological centres.

Construction of technological park in Celje (2006 – 2013)

Tehnology park zone A	2006 – 2010	5 buidings	20.840 m ²
Tehnology park zone B	2009 – 2012	5 buidings	16.393 m ²
Tehnology park zone C	2012 – 2013	2 buidings	12.937 m ²
SUM		= 12 buidings	50.170 m²

Operational plan of the construction of the technological park Celje Zone A, B and C

October, year 2006 - 1st building

In October 2006 the first building of the twelve planned buildings in technological park Celje will presumably be built and equipped.

The building will consist of:

- Technological centre POLIEKO
- Technological centre LENS – laser technology
- Technological centre for development and training for new technology
- University spin off incubator
- Technological companies from region, Slovenia and Europe

Data about the building:

- 5000 m² surfaces
- 4 floors

Forecast of the content of the building number 1 – according to the floors

For the developmental institutions and technological companies there are still some m² available.
